

*"To plant a garden is to believe in tomorrow."*

**Dear Parents,  
Warm Greetings!**

As the Vacation begins, let us prepare ourselves not just to relax and rejuvenate ourselves but also for some creative and constructive work.

With so much to learn in today's hi-tech world, it's too easy for you to miss out on simple and practical life skills. So let's begin by learning a life skill and become a little more independent. Summer vacations are very special time for the children which they await eagerly. They get time to work and have fun out of the restricted schedule of the school, children also get time to pass with their parents, relatives and friends, through which they learn life values.

Children are the unique gift of the God specially gifted an unlimited amount of energy. So we have planned activities and summer assignments to help them in channelizing their energies.

Kindly involve and help them to explore nature and inculcate responsibilities to do things on their own during this summer break.

Encourage them in completing their work and also explore their creative self.

Ask the children to prepare the assignment in a folder with clearly mentioned name, class and section. It would be wonderful if the children themselves decorate the folder. Subject related written assignment should be done in concerned subject's fair copy.

Happy Holidays! Have fun with your child.

**Dr. Dharmendra Sharma
